English
Proficient

Hindi
Native

WORK EXPERIENCE (3.7 Years)

Mall91 - Roviri Innovations (Software Developer) (Nov 2022 - Present) – **2.5 Years**

- **Web3 Initiatives:** Architected a **decentralized** platform (rovi.money) and developed a JavaScript SDK to enable seamless crypto transactions across partner sites
- **AI Integrations:** Spearheaded the design and deployment of AI-driven tools—powering functionalities like **AI based email outreach** for clients based on a **RAG** of the company 's previous projects. ,
- Developed various apps like Chat91, a high-fidelity audio chat solution using WebRTC, socket.io, and ION-SFU for fluid, real-time conversations.

Health & Glow (Software Developer) (Apr 2022 - Nov 2022) – **8 Months**

- Enhanced the e-commerce website by implementing new features and resolving critical bugs using React, Redux, and JavaScript within an Agile framework

Ongraph Technologies (Software Analyst) (Sep 2021 - Mar 2022) – **7 Months**

- Built a word-based game (inspired by Wordle) using VueJS and Express (Node.js) to create engaging REST APIs

PROJECTS

Converge - AI Agent [Github](#) | [Link](#)

- **Tech: Python (FastAPI), MongoDB, VueJS, TailwindCSS, Shadcn, Docker**
- Developed a chat-like UI interface for an AI agent, that uses various **MCP Servers** to publish 1 SEO ready article daily on my [blog](#).

Agentic RAG Apps

- **Tech: Python (Flask), LangGraph, MySQL, LangChain, ChromaDB**
- Created **AI-driven workflows** for CRM to optimise sales, marketing, onboarding and client follow ups.

Unified Payment & User-Auth Server [Github](#) | [Link](#)

- **Tech: NodeJS (Express), MongoDB, PassportJS, Docker,**
- Built a unified user-auth server to accelerate **MVP** development, featuring email/password and **Google sign-in**, and **Razorpay** for secure payments
- Has a **Vue.js starter app** with built-in user-auth & **Payment APIs**, and a ready-to-use **App UI** for MVP's.
- Deployed fully using **Docker** containers on **AWS EC2** instance

Web3 Wallets

- **Tech: NodeJS, EthereumJS, L2 (Boba Network), Biconomy, TON Blockchain**
- Developed secure **Web3 wallets** and **signed Ethereum transactions** using user private keys, while enabling **gasless transfers** via **Biconomy**
- Used Algo's like **Shamir's Secret Sharing** to split and encrypt private keys into 3 fragments (Google sub, user PIN, and security question) for secure backend storage
- Integrated **smart contract methods** using **contract's RPC** and built RESTful APIs for streamlined transaction processing

Polymarket Clone [Link](#)

- **Tech: NodeJS (Express), TypeScript, MongoDB, Shadcn, TailwindCSS**
- Built a polymarket.com clone using their **Clob & Gamma market API's**.
- A **Decentralized prediction market** platform where users can **bet** on the outcome of various **future events**, including **elections, sports, and economic indicators**, using **cryptocurrency**
